

Richmond Timothy

What is it?

Canada's only true multi-cut timothy!

Why grow it?

Features	Benefits
Extra leafy	➔ Improved feed quality for better gains
High yielding	➔ Out yields other varieties in a 2 cut system
Excellent regrowth	➔ Great for two cut hay or fall grazing
Excellent winter hardiness	➔ Suited to the harsh conditions of Western Canada
Early maturity	➔ Ideal for use with multi-cut alfalfa varieties

How to grow it...

Seeding Information	Adaptations	Management
Seed 3-5 lbs/ac	Adapted to wetter areas; capable of thriving under moderate spring flooding	To ensure longevity, do not cut or graze in the two week period prior to head emergence
Seed at ¼ to ½ inch depth into a firm seed bed	Tolerant to acidic soils; well suited to peat areas	For the best quality hay, cut prior to bloom (athesis)
Seedling vigour is good, with rapid stand establishment	Persistent with sufficient moisture	Fertilize according to soil tests; low fertility tolerated but nitrogen increases yield and protein

IT'S A FACT! Richmond is Canada's highest selling proprietary timothy variety!
